Copying and Printing High Resolution Wallboard Photos Simplified

1. Open desired High Resolution Wallboard panel, and depress “F11” key once.
2. Locate and make sure your picture is in its largest condition by Left Clicking (LC) on the picture.
3. Center your large size picture of interest in screen and depress the Print Screen “Prt Scr” key once. You will not see anything happen on your screen when you press Prt Scr key. Note the Prt Scr function maybe slightly different in Vista Operating systems depending on keyboard layout. If the “Prt Scr” is the primary key function just press it once. If the “Prt Scr” key is shown in a different color or boxed, indicating it is a secondary key function, you must depress and hold the Fn key (lower left on keyboard) then press the Prt Scr key once. Check your “Help” section for additional Info.
4. Close all windows and depress the “Windows Start” key.
5. Position the cursor on “All Programs”, then position cursor on “Accessories” and LC on “Paint”.
6. LC on “Edit” then LC “Paste” now select the rectangle “Select” box in upper top right section of the tool bar on the left of screen.
7. Place the cursor in the upper left corner of the desired picture and select the whole picture by depressing and holding the LC mouse button while moving the cursor to the lower right of the picture and release the LC button.
8. LC “Edit”, LC “Copy”, LC “File”, LC “New”, and LC “No” when asked if you wish to save file.
9. LC “Edit”, LC “Paste”, LC “File”, select directory where you want to save the file, LC “Save As”, give new file a name and select the jpg file format in the “Save as type” box.
